

StudyRoom

Find a quiet place to study, instantly.

By Yasmin Ali Abdi
Date: September 25, 2026

Students waste up to 20 minutes walking between libraries and buildings, only to find every study room occupied.

This causes:

- Lost study time**
- Frustration during exam periods**
- Missed group study sessions**

StudyRoom is a mobile app that shows real-time availability of study rooms across campus.

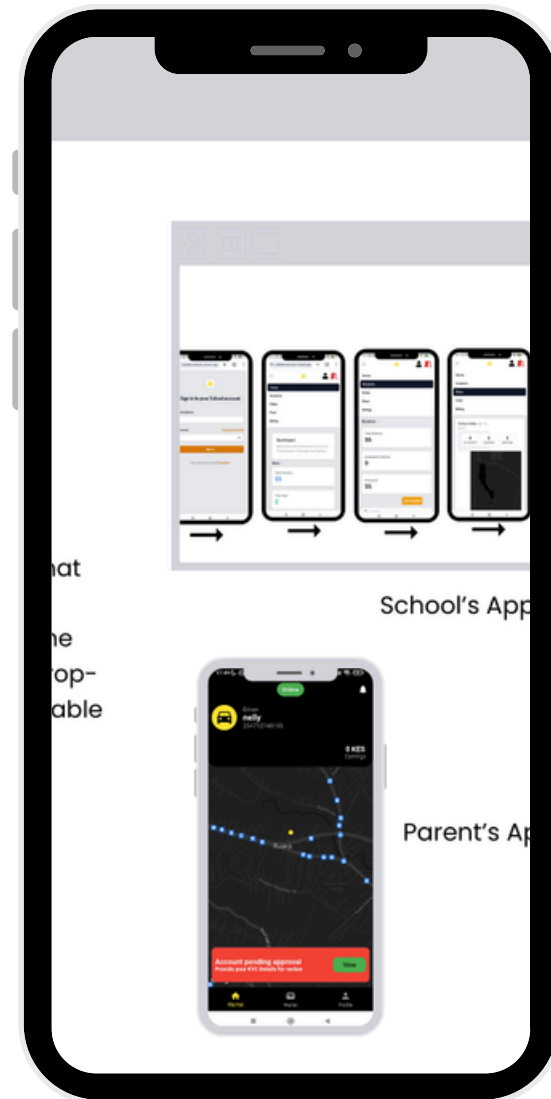

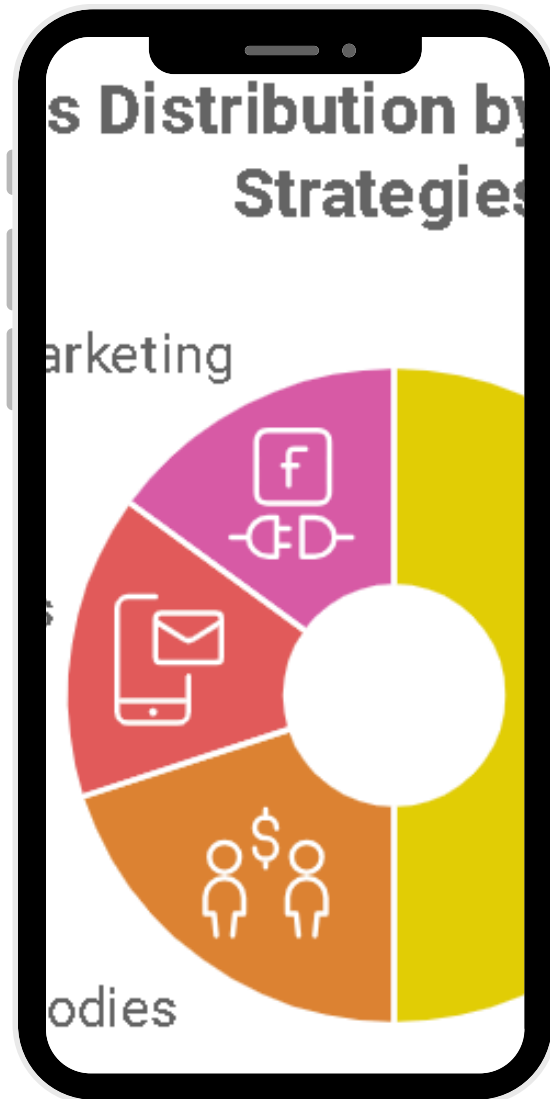

Students can:

- See which rooms are free right now**
 - Book a room in advance**
- Filter by capacity and amenities**

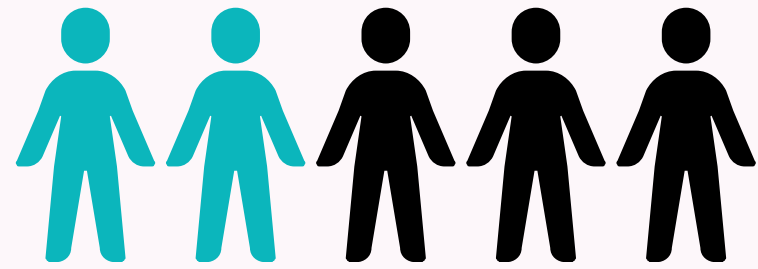

Product

How it works:

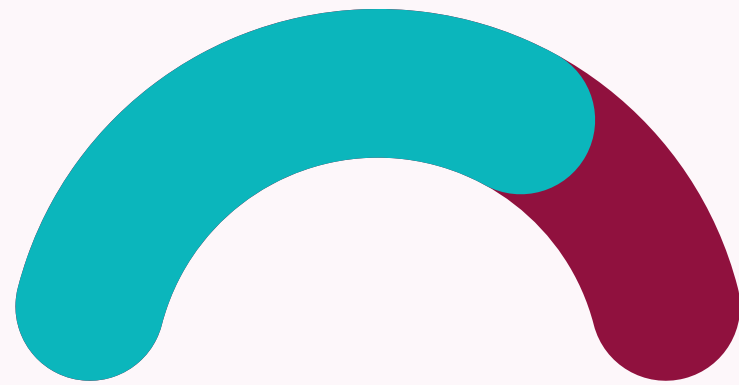

1. Log in with student ID
2. View live map of study rooms
3. Tap a room for details
4. Book instantly
5. Check in with QR code

Target Market

25,000+

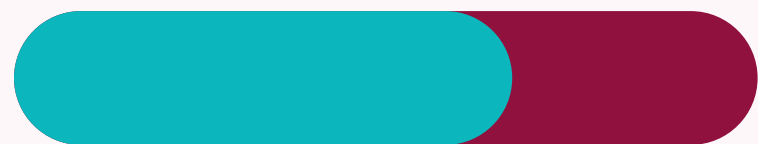

Students on campus

5

Library buildings

150

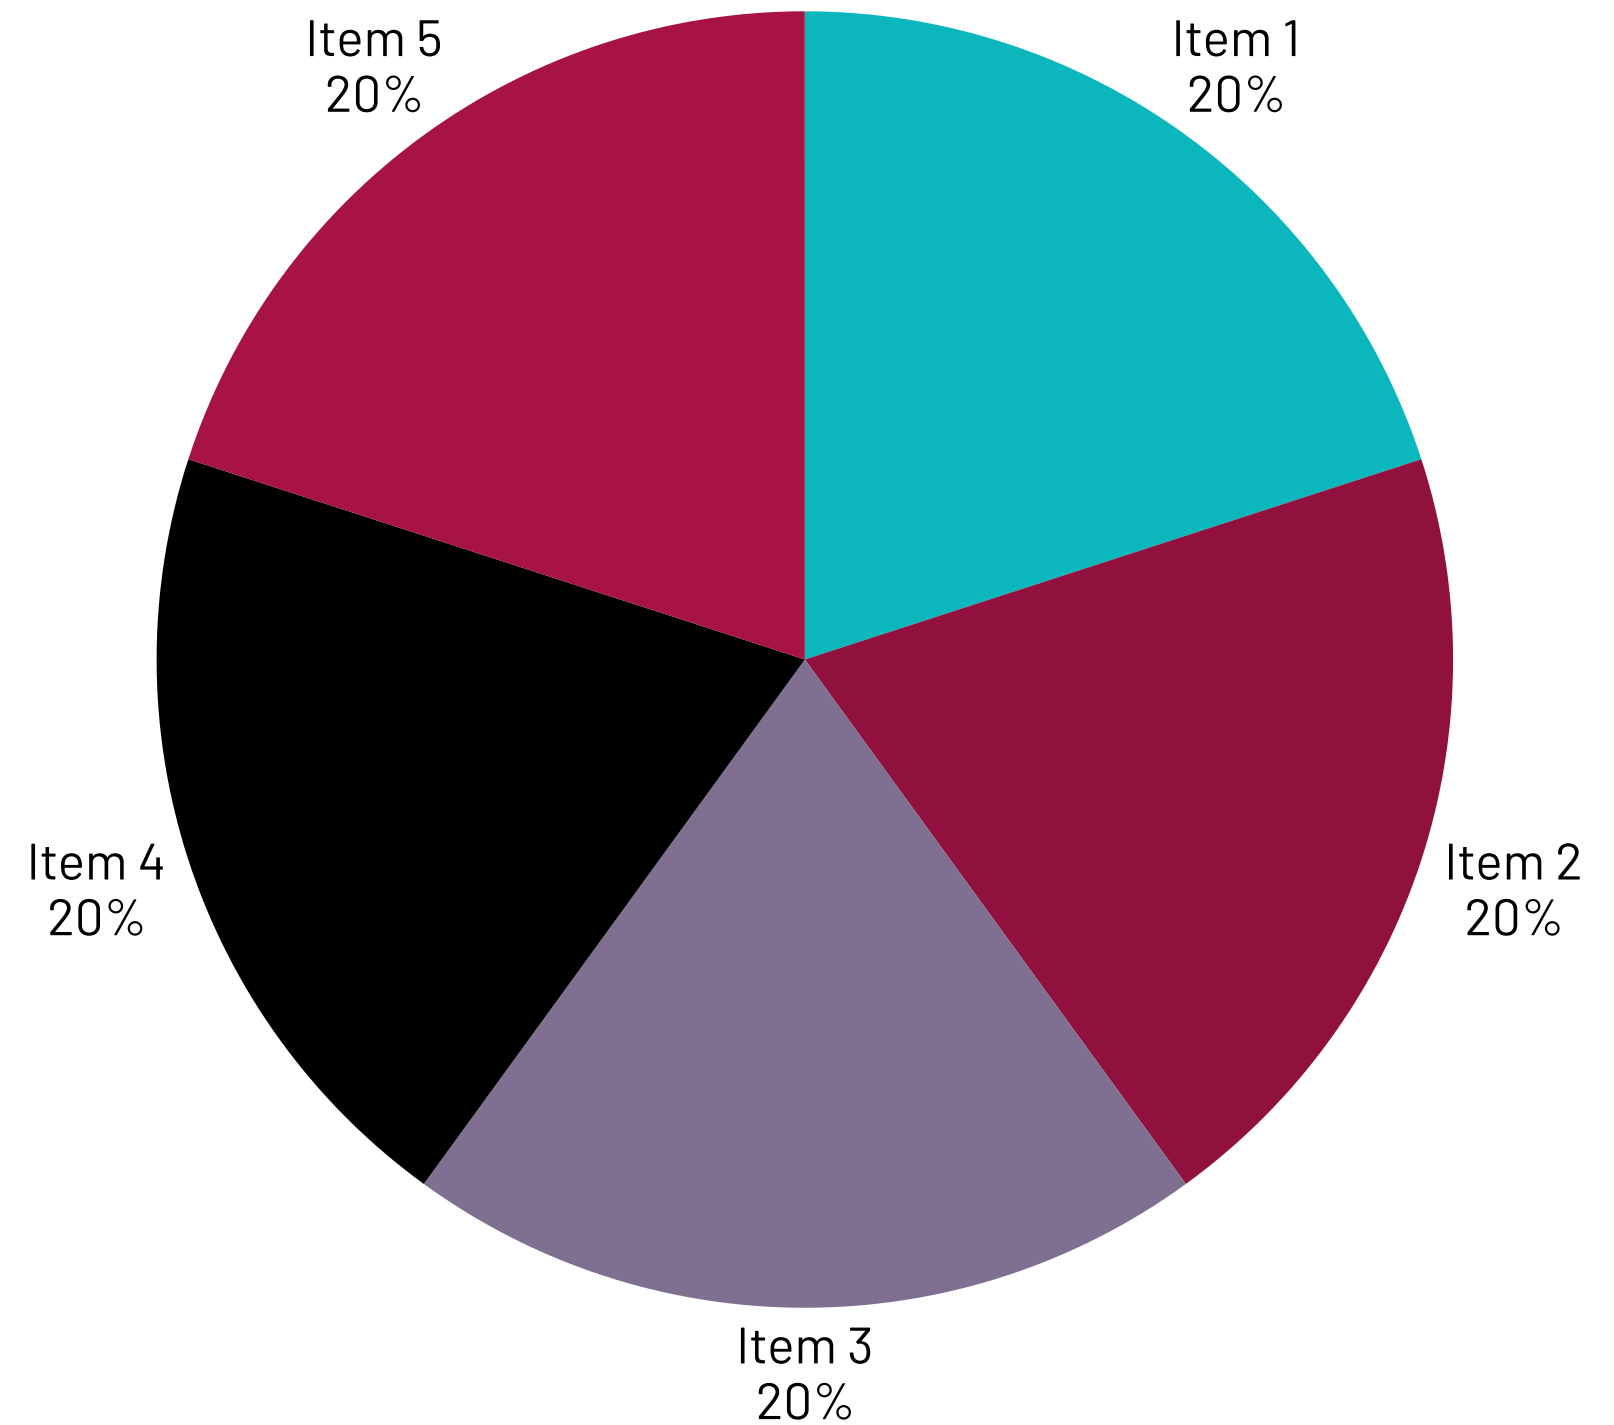

Study rooms available

Market Size

**TAM: 500,000 students in
Kenya**

**SAM: 300,000 with
smartphones**

**SOM: 25,000 at first
campus**

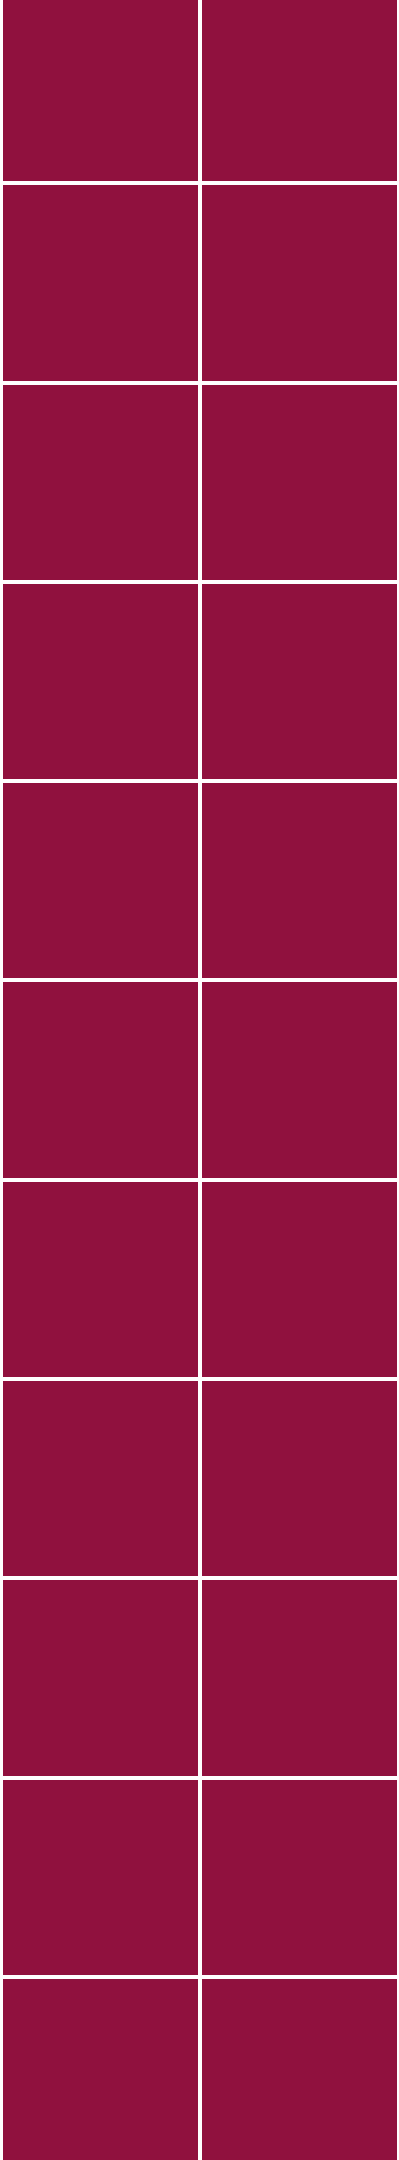

Competitors

Alternatives today:

- Walking around campus
- Outdated library systems
- WhatsApp groups

StudyRoom is the first real-time solution.

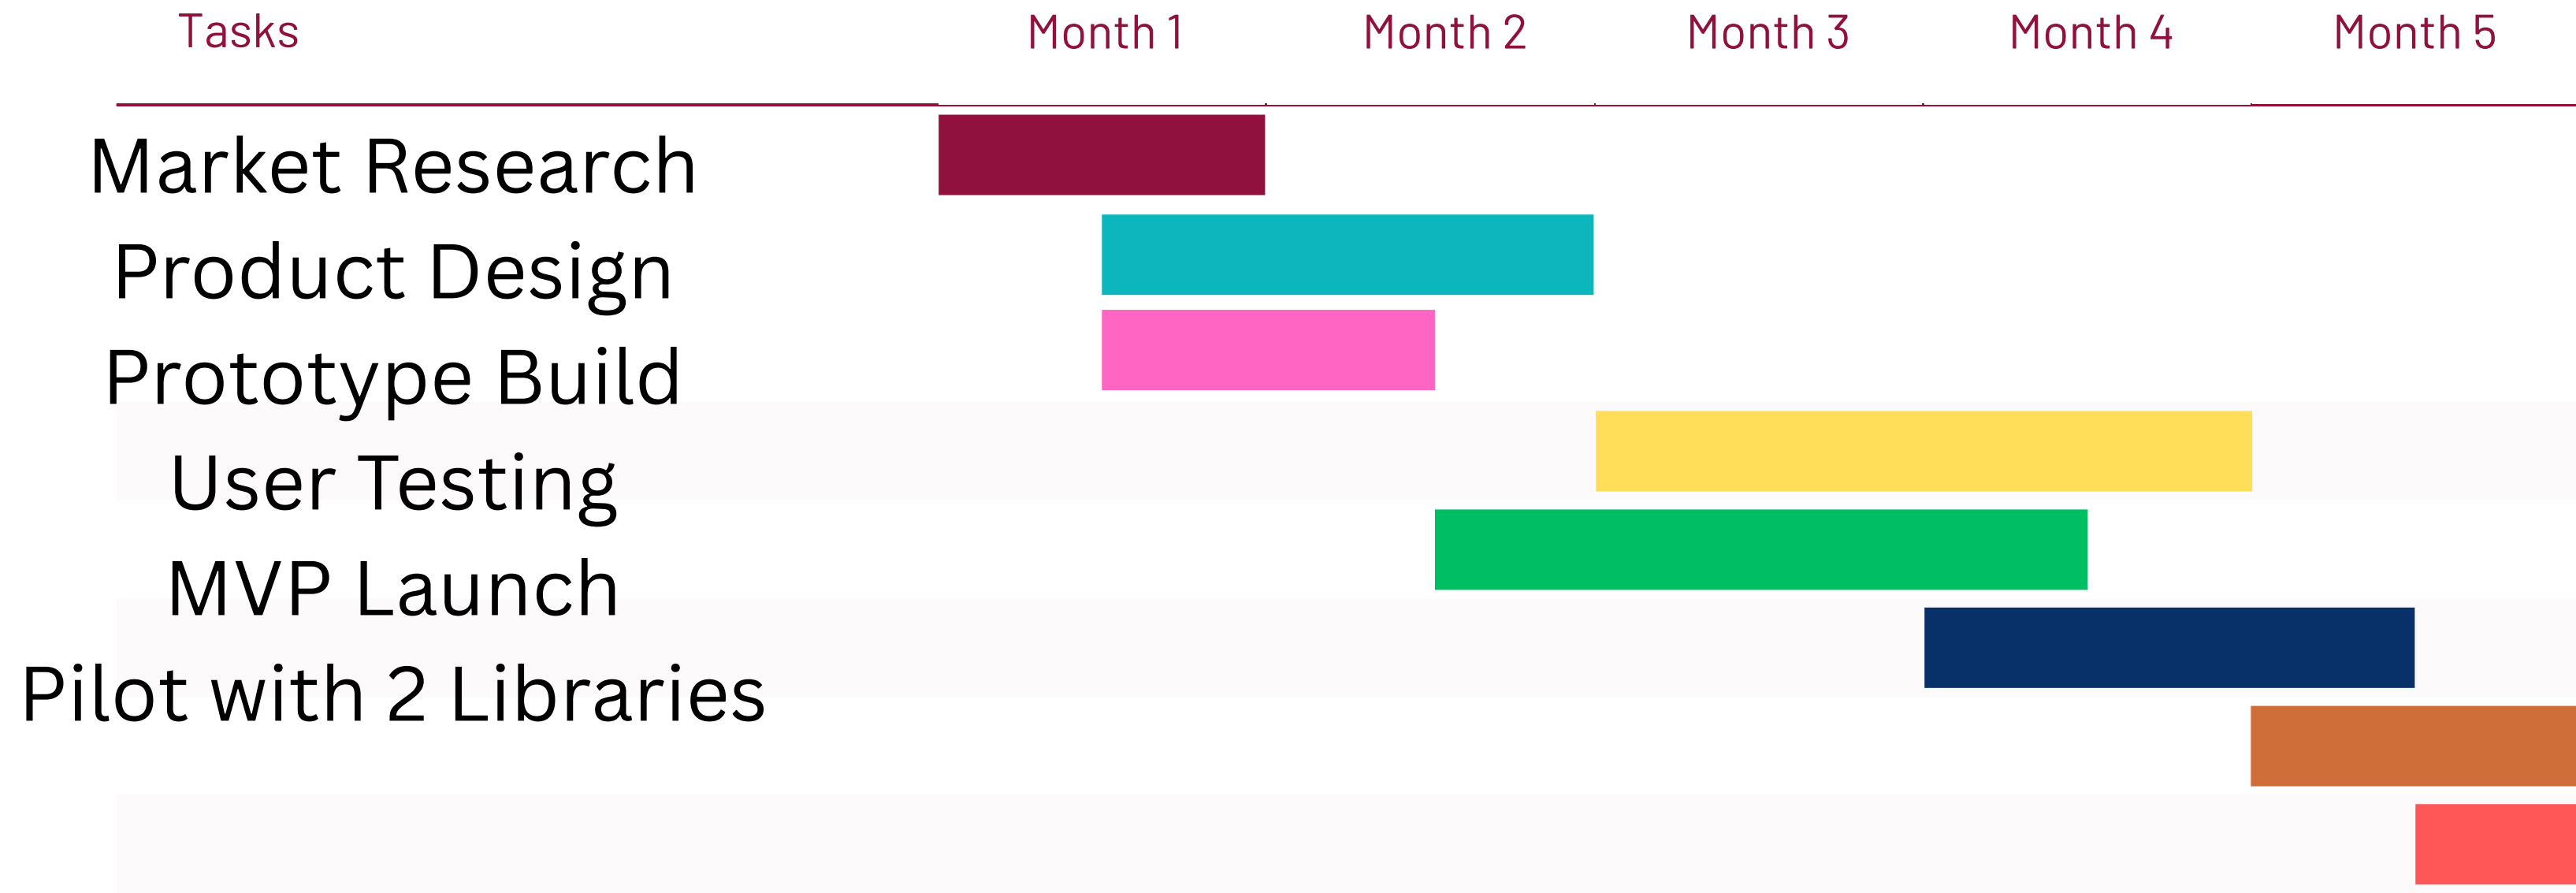

Competitive Advantage

- Real-time availability (not static schedules)
 - Mobile-first design built for students
 - QR check-in to prevent no-shows
- First solution made specifically for university campuses

Project Traction

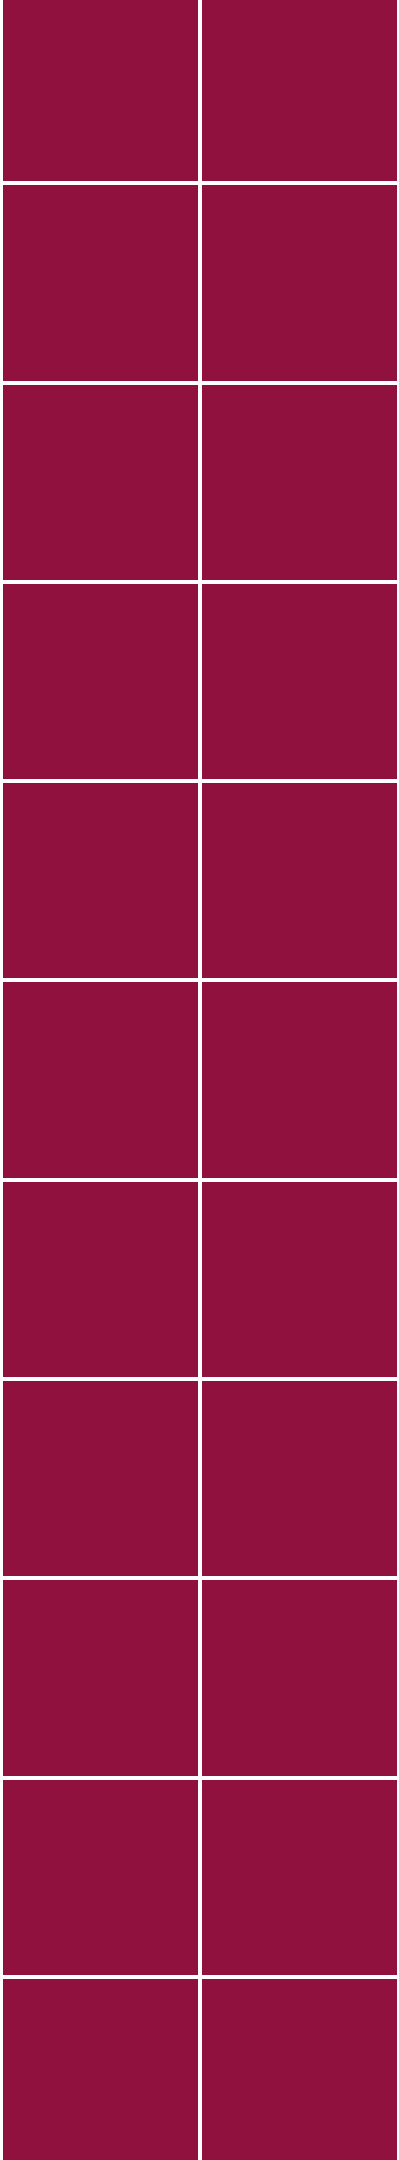

Business Model

Revenue streams:

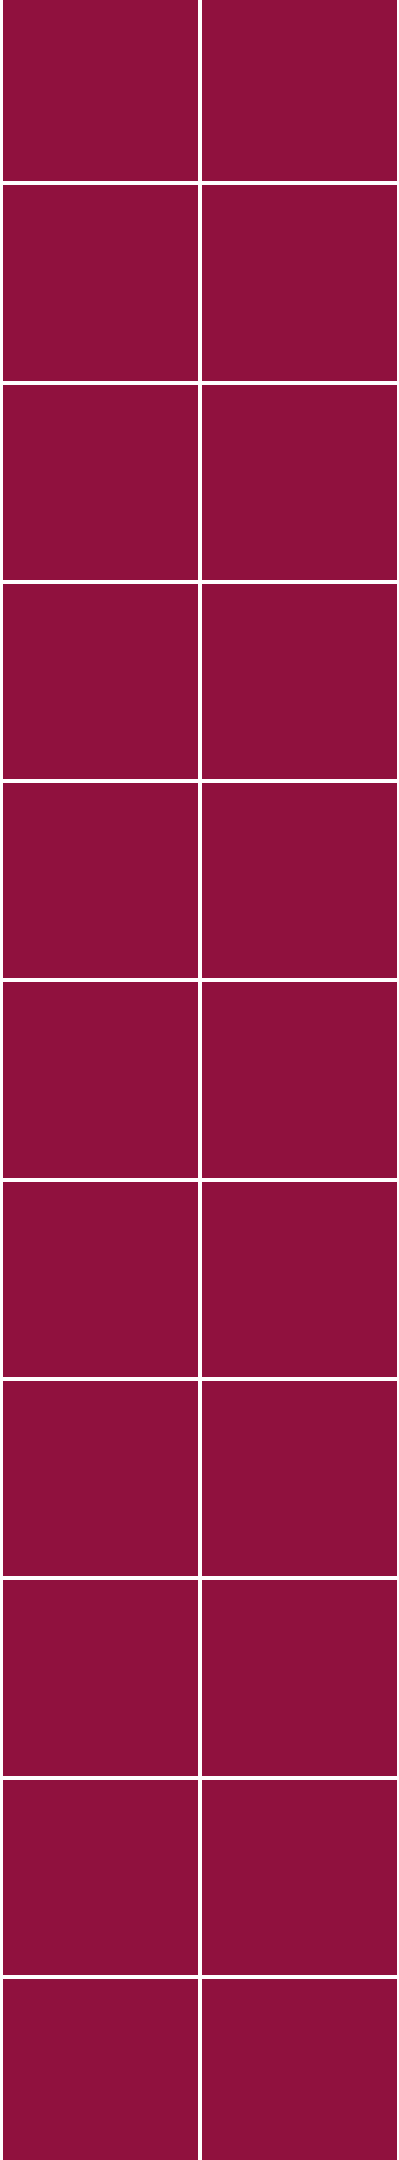

1. Free for students
2. University partnership: KSh 50,000 per year
3. Premium features: KSh 200 per month

Target: 5 universities in year 1 = KSh
250,000 annual revenue

How we will reach students:

1. Partner with university administrations
2. Launch during orientation week
3. Social media campaigns (TikTok, Instagram)
4. Student ambassador program
5. Referral rewards for early users

Social Impact

SDG 4: Quality Education

Helping students find study spaces faster, improving academic success.

SDG 9: Industry, Innovation and Infrastructure

Building digital tools for universities in Kenya.

SDG 10: Reduced Inequalities

Making study spaces accessible to all students, regardless of background.

Our Ask

We are seeking KSh 500,000 in seed funding.

Use of funds:

- App development: 50%
- Marketing: 30%
- Operations: 20%

Goal: Launch in 2 universities in 6 months.
